## A JQCG water-blower

### 1. Main use and scope of application

The production line used to paste the adhesive trademark is used to dry the cans and bottles on the production line, and then paste the adhesive trademark, adapt to the wide tank type, avoid the original brush brush can, brush loss is serious, frequent replacement, easy to pour the bottle into the tank phenomenon, no dust pollution brought by the brush, can easily remove the water. Low energy

consumption, is the most ideal drying equipment on the wine packaging line. Can be used in all kinds of winery, brewery, beverage factory and pharmaceutical factory manufacturers.

### 2. Technical performance and parameters

- 1 Maximum production capacity: 18,000 cans / hour
- 2 Pit tank diameter: 52-99mm
- 3 adaptive tank height: 300mm
- 4 Pipe ts: 34
- 5 Fan power: 7.5KW \* 2
- 6 External Size: 3 000X 800X1800mm (adjustable as required)
- 7 Equipment weight: 1,000 kg

### 3. operational principle

The machine is used for the removal of water droplets on the tank wall, and the vortex fan to the bamboo blowing pipe. When the can with water film water droplets passes through the blowing pipe, the water droplets on the tank wall are quickly blown away, so that he can can be sprayed in time.
